Multimedia Programming and Design

Font: 'Frank Ruhl Libre', serif, #9003fc

The Multimedia Programming and Design Program prepares students for careers in a variety of multimedia industries, companies and institutions that develop, produce or market multimedia products, programs or services. The program instructs students in the design and programming of computer-based interactive products that incorporate text, graphics, sound, animation and video. It also develops different types of talent, both creative and technical, with the imperative that each understands the work of the other so that they can collaborate effectively.
